Claims 1-3 and 6-13 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The specification details which functionalities applicant considers as ionizable for the polyelectrolyte and the surfactant and are critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). Most any polymer with or without a functional group can be ionized given sufficient energy input.

Claims 4 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
